BUSINESS SOLUTIONS

**Professional audio & video solutions
to suit every working style**

PANACAST SERIES

Video collaboration. Reinvented.

PANACAST 50

The first new-normal-ready intelligent video bar¹

- Unique 180° field of view keeps everyone in the picture at a safe distance
- Virtual Director intelligently adjusts the video in real time for more immersive meetings
- Safety Capacity and Room Usage Insights generates anonymous room occupancy data for all your meeting rooms at once
- Network-connected system enables easy remote management and data access
- Real-time whiteboard streaming for more inclusive remote collaboration
- Plug-and-play for fast setup and maximum ease of use
- Intelligent Zoom automatically adjusts the field of view to include everybody in the conversation
- Dynamic composition delivers a close-up view of the 4 most recent speakers in a meeting room

PANACAST 50 ROOM SYSTEM

A simple, complete meeting room solution engineered to bring hybrid teams together naturally

- Complete, certified meeting room solution from two of the most prominent professional technology brands in the industry
- Unique 180° field of view and wall-to-wall room coverage
- Intelligent meeting room experiences and advanced video capabilities enable you to meet more naturally wherever you are
- Precision voice detection and high-fidelity sound to hear and be heard loud and clear
- Active monitoring of room usage and capacity, live safety guidance, and insights
- Real-time whiteboard capture and streaming
- Intuitive touch control and Lenovo ThinkSmart Core+ Controller
- Flexible, scalable deployment in small and medium rooms

PANACAST 20

Intelligent, AI-enabled personal video conferencing

- Premium AI-powered 4K Ultra-HD video quality
- AI-driven Intelligent Zoom keeps you center stage
- Intelligent Lighting Optimization for a picture perfect image, wherever you work
- Picture-in-Picture for even more impactful presentations
- Powerful on-board AI processor improves data security
- Integrated privacy cover guarantees privacy when you need it
- Built for flexible working. Clips to any monitor. Comes with protective case
- Use with a Jabra headset or speakerphone for an outstanding audio experience
- Truly plug-and-play. Works seamlessly with all leading UC platforms

PANACAST

Intelligent 180° flexible video solution

- Inclusive meetings with 180° Panoramic-4K video for a more natural view of your meeting space
- Intelligent Zoom automatically adjusts to include everyone in the conversation
- Real-time whiteboard streaming for more inclusive remote collaboration
- Plug-and-play technology lets you collaborate with others quickly and easily
- Compatible with all leading video and audio-conferencing solutions
- The perfect partner for Jabra Speak, offering an unrivalled combination of crystal-clear audio and Panoramic-4K video

PANACAST MEET ANYWHERE/ MEET ANYWHERE+ BUNDLES

Industry-leading audio and video solutions

- Industry-leading audio and video solutions combined in a lightweight and portable case that instantly let you meet anywhere
- Includes Jabra PanaCast, Jabra Speak 750, and a Table Stand²
- Both bundles come in a premium Travel Case that's lightweight and durable for maximum convenience on the go
- Open the case and start any meeting anywhere with easy plug-and-play connection straight out of the case

¹See facts on [Jabra.com/commercial-claims](https://www.jabra.com/commercial-claims). ²Table Stand only available with Meet Anywhere+.

Jabra hybrid working solutions expand audio visual capabilities at BFM radio to deliver timely news and views in Malaysia

Together, the PanaCast and Speak 750 optimize audio-video quality for content production such as webinars.

OPPORTUNITIES FOR ENHANCEMENT IN BROADCAST PRODUCTIONS

BFM radio plays a pivotal role in business news and current affairs in Malaysia. Daily announcements and discussions cover politics, global news, business, health, fashion, the arts, sports, and music.

Operating within a hybrid working model, BFM's teams rely on successful virtual meetings powered by Jabra professional audio and video solutions.

During the Covid-19 outbreak, teams rotated between in-studio and remote working to minimize contact and safeguard one another. In the office, presenters, coordinators, and producers alike are involved in numerous conference calls, virtual interviews as well as studio recordings.

Producers who work from home are presenting shows, creating content, and conducting digital webinars. Regardless of the location, being heard and seen clearly on air is of utmost importance to maintain the high standards of a broadcast company.

The team's communication equipment originally comprised of standard webcams, and built-in laptop cameras and microphones, which resulted in inadequate audio-video quality outside their limited professional studio equipment.

“

During the Covid 19 outbreak, physical retailers were not operating, which limited our procurement options. We resorted to purchasing equipment online. Inferior Bluetooth connections meant loss of audio, latency, and feedback. This caused interruptions and delays in broadcast transmissions and meetings. Sub-standard camera resolution led to grainy and dull webinar productions, requiring hours of post-production edits. This impacted our ability to produce high-quality audio and video products for clients and listeners.”

Yuzwan Yusuf,
Radio Technical Engineer, BFM 89.9

THE PROJECT AT A GLANCE

BFM Media (BFM 89.9FM), partners with Jabra to equip its broadcast headquarters with a variety of audio-visual solutions to facilitate daily reporting on its regular segments, video podcasts as well as webinars and conferences.

SOLUTIONS

Solutions

- Jabra PanaCast 50**
 A video conferencing bar with 180° field-of-view, Panoramic-4K quality and intelligent picture adjustments. Coupled with powerful speakers that deliver high-definition sounds and the latest 2-way audio technology to promote natural conversations.
- Jabra PanaCast 20**
 The AI-powered 4K Ultra-HD personal video camera includes Intelligent Zoom and Intelligent Lighting Optimization features for picture-perfect images that keep the user always in frame.
- Jabra PanaCast**
 13-megapixel camera with patented real-time video stitching to enable a natural 180° coverage, with plug-and-play connectivity.
- Jabra Speak 750**
 Premium lightweight speakerphone with outstanding audio quality with up to 11 hours battery life.
- Jabra Evolve2 75**
 Professional Bluetooth® headset with 8-mic technology, Advanced Active Noise Cancellation™ and dual foam design for ultra-comfort and crystal-clear calls all day.

Benefits

- Tailored solutions for team members in a variety of settings, including meetings or conferences in small to large meeting rooms, productions in the studio, or working from home.
- 4K video quality enhances BFM's digital content.
- Plug-and-play functionality for easy deployment and portability.
- Compatible with Microsoft Teams, Zoom and leading Unified Communication (UC) Platforms ensuring seamless connectivity and collaboration.

A. PanaCast 50 B. PanaCast 20 C. PanaCast D. Speak 750 E. Evolve2 75

IMPROVING AUDIO AND VIDEO COMMUNICATIONS QUALITY

BFM partnered with Jabra to deploy the professional PanaCast series of video solutions, along with the Speak 750 speakerphone. Right from the start, the BFM staff were delighted with the improved audio and video quality, with many also impressed by the products' sleek and minimalist designs.

With Jabra's full suite of conferencing solutions deployed, BFM's usage is split by room size and type of events:

PanaCast 50 for the large conference room

BFM's main conference room serves as a venue to hold large meetings such as townhalls, client discussions, remote team conferences, and others.

Due to its larger capacity, attendees struggled to be seen using existing basic webcams with narrow viewing angles. With the introduction of the PanaCast 50, every participant can be seen, even those sitting right beside the camera to those sitting at the far end of the conference room.

When speaking to a large group, voices can overlap with some left unheard. The PanaCast 50 features beamforming microphones and intelligent noise removal to enable attendees to speak comfortably from anywhere in the room, without needing to raise their voice. With its four powerful speakers, the PanaCast 50 can instantly fill the open space with high-definition audio.

At any point in a meeting, tweaks in camera and audio settings might be required to ensure optimum video and audio. Flexible is the word BFM uses to describe Jabra solutions, having either the remote control or Jabra Direct / Jabra Sound+ app at the ready.

As meeting types differ, so do their hosts and equipment used. In the morning, a team member might use the room for a large client meeting, connecting to his or her laptop. Whilst in the evening, a townhall session could involve another host with a different laptop.

Between these meetings, there would previously have been time-consuming audio-video (AV) configurations and setups required. The PanaCast 50 is easy to manage with just a single step – simply plugging in to the laptop. This ease of use removes the need to have a technical person on standby each time a meeting takes place.

“

Overall, the products have helped to improve audio and visual quality tremendously. They are also beautifully designed and aesthetically pleasing. It's safe to say that at BFM, Jabra's deployed solutions let us function at our best: delivering news, views and vital content to our listeners.”

Caroline Oh,
Radio Program Director, BFM

PanaCast and Speak 750 for small meeting rooms/video podcasts

BFM recently introduced its digital content arm, where teams produce videos, webinars, and other digital products, and this work needed its own specific communications infrastructure.

The compact PanaCast 20's 4K resolution greatly improves video quality in the studio.

Their digital content producers regularly use BFM's smaller meeting rooms, where presenters host and record video webinars. More confined than their larger spaces, they previously utilized basic AV setups or built-in laptop cameras and microphones. Though these spaces are small, a wide field of view gives producers a better frame for filming, and this is where the PanaCast stood out. Its compact size enables it to fit discreetly in the room whilst giving 4K, 180° coverage.

To complement its video capabilities, the PanaCast goes well with the Speak 750, as a regular laptop microphone is inadequate to pick up voices clearly even in a small room setting. The Speak 750's omnidirectional microphones have excellent range, with audio remaining crystal clear for production, even across the room.

“

“The PanaCast20 and Evolve2 75, paired together, give me nearly the same quality as a recording studio, but with added portability for external office assignments or work from home days. I rest easy knowing that I can produce well without the hassle of complicated setups and teardowns. All that's needed here is a USB port and Bluetooth connection.”

- Ali Johan,
Producer/Presenter, BFM 89.9

PanaCast 20 and Evolve2 75 for personal use

With teams working remotely, content is sometimes recorded independently. For this purpose, a PanaCast 20 personal video camera is an excellent tool for presenters, providing real-time 4K video, while automatically correcting the lighting for a sharp and crisp image.

The Evolve2 75 headset complements the PanaCast 20. The Evolve2 75 features four microphones with Advanced Active Noise Cancellation™, removing the need for double-takes. When not on air or recording, the headset's boom arm can be moved up and safely stowed out of the way.

Jabra professional audio and video solutions are helping BFM stay at the forefront of the broadcast industry, where communication is everything.

In cooperation with

SPEAK SERIES

The world's leading professional speakerphone brand

Instant boardroom anywhere

SPEAK 810

Professional stationary speakerphone

- Starts meetings quicker than ever via USB, Bluetooth or 3.5mm connection to your computer or smartphone
- Superior audio for larger conference calls
- Picks up sound from virtually any direction
- User-friendly call controls on the speakerphone
- Conference room coverage for up to 15 people

¹Variant dependent

Professional portable speakerphone

- Slim and compact design lets you hold conference calls anywhere
- Crystal-clear voice experience ensures everyone is heard with omni-directional microphone
- USB or Bluetooth connection to smart device
- Up to 10 hours battery
- In-room coverage for up to 4 people
- Smart button – Personalize your Speak with MS Cortana, Siri® and Google Assistant™
- Set up in seconds, compatible with all leading UC platforms

Delivering great sound to the power of dreams

World-renowned automotive brand Honda, famed for its 'Power of Dreams' slogan, chose the Jabra Speak Series for its automotive engineering team. Three months later, we checked back with them to see how the Speak 510, 710 and 750 models are helping the Japanese giant to improve communication in its organization.

ABOUT HONDA

In 1922 at the age of 15, Soichiro Honda left school and began working as a mechanic for Tokyo Art Shokai, an automobile servicing company. Six years later, he returned to his hometown, Tenryu, and opened his auto repair business. In 1937, Honda founded Tokai Seiki to produce piston rings for Toyota. Unfortunately, his plants were destroyed by bombings during World War II, and he sold the remains of his company to Toyota.

Honda regrouped and founded the Honda Technical Research Institute in 1946 to build and sell motorized bikes. The success of the bikes led to the formation of the Honda Motor Company in 1948 — and the rest is history. Today, Honda is one of the top automobile brands in the world.

BRINGING EVERYONE TOGETHER

In a busy engineering environment, where teams often work remotely in different departments or locations, group meetings are vital for consistent communications right across the business. And that means everyone involved needs to be heard as clearly and as seamlessly as possible, with no drop-out or interference. This is an area in which Jabra is especially well versed, with its Speak Series of professional portable speakerphones.

A range of easy-to-use plug-and-play conference call speakerphones with superior sound quality, the Jabra Speak Series is perfectly engineered to meet the varying personal and group collaboration needs of modern business. And the engineering teams at Honda were quick to appreciate the quality.

“We work over four offices in four different locations and have over 1200 employees. Our ageing PABX system was struggling to cope and some of the handsets were defective. We chose Jabra because we liked the quality, durability and clear audio.”

Jason F. Rotolo,
IT Department Head, Honda Philippines, Inc.

THE PROJECT AT A GLANCE

Honda is partnering with Jabra to equip its automotive team with portable USB and Bluetooth® speakerphones to enable remote meetings across the company.

SOLUTIONS

Jabra Speak 510, 710 and 750:

- Premium speakerphones optimized for small meeting rooms
- Great sound from the experts in professional audio
- Lightweight design, protective travel pouch, and 15-hour battery

Benefits:

- Outstanding audio performance allowing everyone to hear and be heard when it matters
- Out-of-the-box compatibility with all leading UC platforms, including Microsoft Teams & Zoom
- Plug-and-play functionality for instant collaboration

QUALITY COMMUNICATION PAYS DIVIDENDS

Thanks to the unique Jabra ZoomTalk™ microphones, which use advanced digital signal processing to detect the human voice and filter out unwanted background sounds, other ambient noise is cut out. This makes them perfect for engineering and machining environments, where even the quietest meeting room can't eliminate every external noise. And of course, with clear audio comes a marked reduction in confusion and misunderstanding, resulting in higher productivity and efficiency.

Says Jason F. Rotolo, the IT Department Head at Honda Philippines, Inc, “Business performance has gone up after using Jabra technology. The Speak range we have has clear audio that enables better communication during meetings and other conferences. And we like that they are handy and portable with a long battery life, too.”

A MICROSOFT TEAMS ENVIRONMENT

Like many companies around the world today, Honda uses Microsoft Teams as way of multi-conferencing with employees from various locations. The Jabra Speak 750 is certified for Microsoft Teams and has a dedicated Microsoft Teams button, so connection to your colleagues is always at your fingertips, whether you're present in the meeting room or not. Honda has four of these around its engineering sites for its employees to use. “It's easy to set up any time,” says Rotolo, “allowing us to multitask while we are working.”

As Honda's conference needs change and adapt to the needs of its employees, so Jabra is at the forefront of the Japanese giant's plans for providing an ever-more intuitive and cost-effective communications rollout. “We are considering integrating the Speak range to our PABX upgrade and replacement plan,” Rotolo affirms.

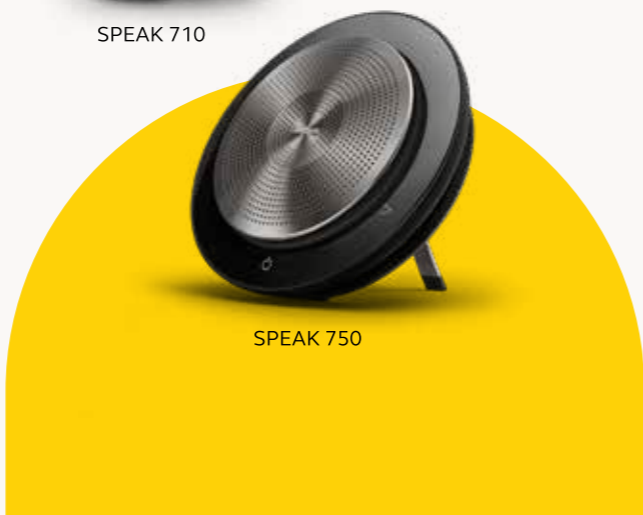

By adding the Speak Series to his plan, he can be assured of a virtually instant set-up, crystal clear voice experiences, as well as a compact, portable design that's built to withstand the demands of a busy engineering environment and allow his team to hold conference calls anywhere. And thanks to our seamless plug-and-play connectivity, all the Honda team has to do is simply connect via USB or Bluetooth® to get their meetings started instantly.

And that's a dream come true.

SPEAK 710

SPEAK 510

SPEAK 750

In cooperation with

EVOLVE2 SERIES

It's not just new in every way. It's the new standard.

EVOLVE2 85

Professional wireless headset with ANC

- Digital hybrid Active Noise Cancellation (ANC), and incredible noise isolation
- 360° busylight, visible from all angles
- 10-microphone technology
- Up to 37 hours battery life
- Powerful 40mm speakers and AAC codec
- All-day comfort, with soft memory foam and an ergonomic design
- UC and Microsoft Teams certified variants available.

EVOLVE2 75

Professional wireless headset with ANC

- Adjustable Jabra Advanced Noise Cancellation (ANC)
- 8-microphone technology
- 360° busylight, visible from all angles
- Up to 36 hours battery life
- All day comfort with increased ventilation and reduced pressure
- UC and Microsoft Teams certified variants available

EVOLVE2 40

Professional wireless headset

- New angled design with memory foam ear cushions for noise isolation like never before
- 360° busylight visible from all angles
- 3-microphone technology for better calls
- Powerful leak-tolerant 40mm speakers
- All-day comfort, with soft memory foam cushions that mold to your ears' contours
- Choose between USB-A or USB-C variants
- UC- and Microsoft Teams certified variants available

EVOLVE2 65

Professional wireless headset

- 3-microphone technology for better calls and seamless collaboration
- Powerful leak-tolerant 40mm speakers
- New angled design with memory foam ear cushions for noise isolation, like never before
- 360° busylight visible from all angles
- Work wirelessly, wherever, with 37 hours of battery life
- UC and Microsoft Teams certified variants available

EVOLVE2 30

Professional corded headset

- Ultra-lightweight for enhanced all-day comfort
- 2-microphone technology for less background noise on calls
- 28mm speakers for outstanding audio
- Noise-isolating design
- Reinforced steel headband & slider for increased durability
- Integrated busylight for instant 'do not disturb' mode
- UC and Microsoft Teams certified variants available

Helping healthcare start-up professionals to communicate seamlessly

PROVIDING PROFESSIONAL-GRADE COMMUNICATIONS TO HEALTHDR

HealthDr is a health-tech start-up sponsored by Enterprise Singapore, a government agency that champions enterprise development. The mission of HealthDr is to provide citizens with the tools to assess their medical condition quickly and offer them healthcare services in line with their needs, through a unified AI-driven platform.

The Director of Business Development and Director of Product Research and Implementation co-founders hold a lot of virtual calls with their clients and partners, and their hybrid working team needs effective technology to ensure productivity.

A long-time Jabra user, Mr Chan Joo Kwang, CEO and co-founder of HealthDr, was already familiar with the quality of Jabra's Elite 65t and 75t consumer products, and decided to try out Jabra's professional-grade devices.

Originally, the HealthDr team had been using in-built speakers from their laptops or wired earphones, but poor call quality was impacting client discussions and staff felt restricted due to the cables. Mr Chan recognized the importance of providing the best meeting experience with clients and decide to upgrade to audio technology purpose-built for professional use.

“

“With Jabra solutions, we have achieved a high level of professional communication internally and with our clients. The Jabra Speak 750 is truly a game changer. Previously, we found ourselves huddling close to one another to speak to the laptop mic. Now, we can have a more natural setup where everyone can sit comfortably and speak at ease.”

Chan Joo Kwang,
CEO & Co-founder, HealthDr

THE PROJECT AT A GLANCE

HealthDr engaged Jabra to provide professional-grade solutions to deliver a better meeting experience with their key partners and customers.

SOLUTIONS

Jabra Evolve2 75
Professional Bluetooth® headset with 8-mic technology, Advanced Active Noise Cancellation™ and dual foam design for ultra-comfort and crystal-clear calls all day.

Jabra Speak 750
Premium lightweight speakerphone with outstanding audio quality with up to 11 hours battery life.

Jabra PanaCast 20
AI-powered 4K Ultra-HD personal video camera with Intelligent Zoom and Intelligent Lighting Optimization features for picture-perfect images that keep the user always in frame.

Jabra Evolve2 75

Jabra Speak 750

Jabra PanaCast 20

Mr Chan chose the Evolve2 65, Speak 750 and Evolve2 75 for the crystal-clear audio experience, complemented by the PanaCast 20 for its outstanding personal video quality. HealthDr was exploring different brands and going through various reviews, but no other products caught their attention like the Jabra products.

The Jabra Evolve2 75 wireless headset allowed the users to take their calls with greater freedom as they no longer felt restrained by the wires. The Advanced Active Noise Cancellation™ (ANC) feature also helped to block all ambient noise to ensure that staff can listen with utmost focus and clarity. There is no need to constantly ask the other party “did you hear me clearly?” or even need to repeat the message several times as before.

Eight precision-placed microphones and a triple chipset-powered Jabra algorithm in the Evolve2 75 filter out background noise effectively, allowing the team to handle calls without interference from their environment. This can be a real lifesaver when working from home with kids crying or noisy traffic in the background.

CAPTURE THE FINE DETAILS USING AN ULTRA-HD INTELLIGENT VIDEO CAMERA

Using unreliable tools add to the video fatigue that professionals experience when attending numerous virtual meetings. Being healthcare consultancy professionals, it is important to have both audio and video clarity to avoid miscommunications which may disrupt their ability to provide expert consultation to their clients.

“

“The PanaCast 20 is a cool gadget that provides picture-perfect video quality and even zooms in automatically with my movements. It is important for healthcare practitioners to portray a professional image. With the PanaCast 20, I have stopped using my laptop webcam or my mobile camera as a stand-in. It also avoids the hassle of incoming messages and calls coming from my phone, and provides far superior video quality than my phone ever could.”

Chan Joo Kwang,
CEO & Co-founder, HealthDr

The co-founders noticed that their partners and clients were impressed with their setup and commented that the communications were very clear during discussions. Security was another important benefit. Due to the powerful Edge AI processor that processes everything on-device, no data gets stored anywhere, keeping the data captured by the PanaCast 20 safe from potential cyber-attacks. This is significant especially when healthcare professionals handle sensitive patients' data and hold confidential conversations regularly.

STREAMLINING SETUP WITH UNIFIED COMMUNICATIONS (UC) CERTIFIED DEVICES

UC certified devices such as the Jabra Evolve2 75, Speak 750 and PanaCast 20 are rigorously tested to meet the standards of performance and functionality for UC platforms such as Microsoft Teams and Zoom. This makes it an excellent choice for budding start-ups like HealthDr where the team is lean, and things need to move fast and seamlessly. The assurance that they can simply plug-and-play with popular conference call platforms such as Zoom, Microsoft Teams, and Google Meet also helps to give them a peace of mind.

EFFORTLESS SETUP AND FEATURES EXCEEDING ALL EXPECTATIONS

By harnessing the tools, HealthDr was able to focus on the messaging to their partners and clients and less on the technical challenges.

“

“Jabra is the solution for every business that values audio and video quality, in both fixed location and on the move. So far, the installation, use of products and managing these devices have been very straightforward. There is no need to troubleshoot constantly. I truly enjoy using Jabra solutions. The devices are so easy to use, and the performance exceeds my expectations in every way that I will give

Chan Joo Kwang,
CEO & Co-founder, HealthDr
